#### **DETAILED ACTION**

### Response to Arguments

1. Applicant's arguments filed 19 January 2005 have been fully considered but they are not persuasive.

2. Applicant argues that the volume ratio ranges presently claimed would not have been obvious in view of the teachings of Hsiung et al. Examiner respectfully disagrees. Examiner agrees that while Hsiung et al. teaches a gas comprising the elements presently claimed as well as some volume ratios within the presently claimed ranges, Hsiung et al. is silent about other volume ratios, in particular the ratio of elements with respect to SF<sub>6</sub>. However, as applicant has provided no evidence of the criticality or unexpected results due to the claimed ranges, and in fact states in page 12, lines 7-18 of the present disclosure that, "the mixing ratio for the gas components... is not particularly limited. However, the ratio is usually...," Examiner holds that the ranges presently claimed would have been obvious in view of Hsiung et al.

# Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-6, 8-18, and 20-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hsiung et al.

Application/Control Number: 10/088,306

Art Unit: 3749

3. Hsiung et al. teaches a gas comprising SF<sub>6</sub>, F<sub>2</sub>, NF<sub>3</sub>, O<sub>2</sub>, N<sub>2</sub>, and CF<sub>4</sub>. Note column 2, lines 61-64 and column 3, lines 52-60. Hsiung et al. does not specifically teach a gas having the volume ratio ranges presently claimed. However, Hsiung et al. does teach gas mixtures having volume ratios between NF<sub>3</sub> and N<sub>2</sub> that fall within the range presently claimed (note column 5, lines 21, 22, and 46), suggesting that gas mixtures having the ranges presently claimed could reasonably be assumed to fall within the "mixtures thereof" taught by Hsiung et al. in column 2, line 64. Therefore, absent a showing of criticality or unexpected results, such claim limitations fail to constitute a patentable distinction over the prior art of record.

### Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3749

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Kathryn S. O'Malley whose telephone number is

(571)272-4879. The examiner can normally be reached on M-F (9:00-6:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Ira Lazarus can be reached on (703)308-1935. The fax phone number for

the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
